

## A Property Management Solution Backed by Unparalleled Customer Care

PropertyView Solutions provides a complete, integrated property management and accounting package to meet the needs of growing property management companies. Our leading software is designed for multi- and single-family residential properties, as well as student housing, home owners associations and commercial properties of varying sizes and complexity.

- Microsoft .NET framework creates flexible deployment options that fit your changing business needs.
- Web-enabled, NOT web-dependent. Run independently of having Internet connectivity.
- Remote users experience LAN-speeds and convenience.
- Designed for familiarity and ease-of-use.
- Centralized data is secure, under your control and exclusive to your business. No third party server or database, no commingling of data.

\*CITRIX or other suitable terminal server application.
